

## LibriXSoft | Business Services Overview

### PROFESSIONAL SOFTWARE ENGINEERING SERVICES

**LibriXSoft** is a software engineering company based in **Mexico City**. We help companies build, modernize, and secure their digital platforms with senior teams focused on measurable business outcomes. We also integrate **AI-assisted development** into our delivery cycle using tools like **Gemini, Claude, OpenClaw, and Codex** to boost speed and quality.

#### What we deliver

- **Enterprise web applications** that are fast, secure, and scalable.
- **Modernization of legacy systems** to reduce operational risk and improve performance.
- **Applied cybersecurity** to protect customer data and business operations.
- **UX/UI implementation** for clear, professional user experiences.

#### How we help your business

- **Speed to value:** rapid onboarding and delivery milestones.
- **Lower risk:** security-first development and quality controls.
- **Reliability:** systems designed for high availability and growth.
- **Clear communication:** agile delivery and structured requirements gathering.

#### Where we have experience

- Banking & fintech
- Retail & consumer services
- Insurance & enterprise platforms
