

## LibriXSoft | Services List

### PROFESSIONAL SOFTWARE ENGINEERING SERVICES

**LibriXSoft** is a software engineering company based in **Mexico City**, focused on enterprise web solutions, platform modernization, and applied cybersecurity. We operate as an **engineering team** that delivers end-to-end solutions with senior talent and a results-driven approach. We also integrate **AI-assisted development** into our delivery cycle using tools like **Gemini**, **Claude**, **OpenClaw**, and **Codex** to boost speed and quality.

#### 1) Software Development & Architecture

- **Enterprise web applications** with **Java** and modern frameworks (**Spring Framework / Spring Boot**).
- **Microservices architecture**, **scalable APIs**, and high-availability corporate stacks.
- **Full-stack development** with **HTML5**, **CSS3**, and modern frontend frameworks.

#### 2) Modernization, Security & Quality

- **Legacy modernization** to modern stacks with minimal or zero downtime.
- **Applied cybersecurity** (XSS, SQL Injection, OWASP controls) and API hardening.
- **Quality & observability**: automated testing, SonarQube, CloudWatch, Grafana.

#### 3) Cloud, DevOps & Data

- **Infrastructure & deployments** on AWS, Azure, and GCP.
- **CI/CD** with Jenkins, GitLab CI, GitHub Actions.
- **SQL/NoSQL databases** and Kafka messaging.
